

Easy radius adjustment.

Easy arc adjustment.

1. Arc Adjustment: (Excludes 360 models)

- Install the MP Rotator with the **Left Edge Indicator** pointing to the left side of the desired watering direction.
- With the MP Rotator operating and in the pop-up position, rotate the **Arc Adjustment Ring**:
 - Clockwise to increase the arc
 - Counter-clockwise to decrease the arc

2. Radius Adjustment:

- Factory setting is for full radius. Radius can be reduced by 25%.
- With the MP Rotator tool or small, flat-bladed screwdriver, rotate the **Radius Adjustment Screw**:
 - Clockwise 4 full turns to decrease arc to minimum
 - Counter-clockwise 4 full turns to increase arc to maximum

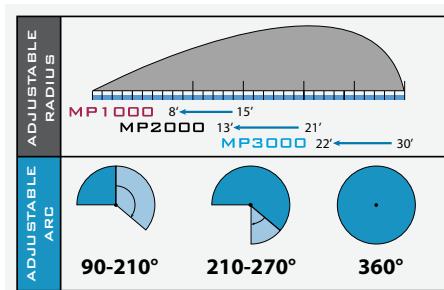

MP ROTATOR®

The Ideal 8'-30' Solution

Maintain Matched Precipitation — Any Arc, Any Radius

All MP Rotator® sprinklers can be combined on the same zone for greater design and installation flexibility.

Water Conservation

MP Rotators are more efficient than sprays because they apply water more slowly and evenly. In fact, you **use 30% less water** even though you run MP Rotators about twice as long as sprays. See below for comparison at 30 PSI with half-circle operation:

15H Spray Nozzle 1.85 GPM x 10 minute run time = 18.5 gallons

MP2000 90-210° 0.63 GPM x 20 minute run time = 12.6 gallons

SAVINGS = 5.9 gallons or 31.9%

Lower System Cost

The good news about applying water more slowly and evenly is that MP Rotators lower your system costs. You can run more heads off your water meter and reduce the number of zones required. In many cases, you can use smaller pipe. See below for comparison at 30 PSI with half-circle operation.

AWWA	Max. Safe Flow (GPM)	Loss (PSI)	Max. # 15H Sprays	Max. # MP2000s
5/8"	15	8.3	8	24
3/4"	22	7.9	12	35
1"	37	8.3	20	59
